

Plastics Solutions

Kathabar temperature and humidity controlled clean air systems

Injection Molding

Blow Molding

PET Plastics Forming

FEATURES

- Removes moisture from air
- Prevents condensation on molds
- Decreases cycle time
- Improves part quality
- Increases production rate and reduces imperfection/reject rate
- Eliminates rust and extends the life of molding equipment
- Minimizes maintenance and retooling needed on equipment
- Reduces safety hazards such as wet floors
- Introduces bacteria-free air
- Energy efficient operation reduces utility consumption
- Can be used for full room conditioning or individual mold control (machine shrouding, dry air purge)
